SECTION 4 Evolving Areas of Knowledge, 177

15 **The Evolving Theory of Clinical Reasoning, 178**
Carolyn A. Unsworth
16 **Occupational Science: Genesis, Evolution and Future Contribution, 198**
Matthew Molineux & Gail E. Whiteford

Index, 208

The 6th edition of *Foundations for Practice in Occupational Therapy* continues to provide students and practitioners with a strong grounding in the theoretical foundations of occupational therapy and its application to practice. Organised into four parts it covers everything from the philosophy, principles and practice of occupational therapy, through to models of practice, frames of reference and evolving areas of knowledge. The book is authored by international experts in the field of occupational therapy, evidence based, and fully referenced. The book:

- Discusses evidence-based practices and established theories, as well as contemporary developments
- Includes a range of expert contributors who provide an international practice perspective
- Has case studies that highlight the application of theory to practice
- Details the latest developments and debates in the field
